

OM Mani Padme HUM HRIH

A Gathering

One of the greatest mantras to ever emerge from the hallowed grounds of ancient civilization comes from the Indian continent known for being the guardian of spiritual knowledges and teachings. Millions of people visit this sacred estate in search of genuine knowledge to transform their inner lives. And attain a certain inner peace that is lacking in their modern-day lifestyle. Out of this sacred ground of Indian mysticism comes the practice of Yoga, Meditation, Mandala and Mantra adopted by the western mind for their safe haven.

The mantra Om Mani Padme Hum lives in the hearts of humanity as a process of reflective meditation. More importantly, this mantra is a psycho-spiritual psychology for practical living. The echo of OM reverberates through the aeons of time within our souls. A closer visit to this amazing and inspiring mantra gives us a resounding mental tool. We must ponder and contemplate these subtle instructions for our enlightenment and the development and growth of our immortal conscious soul.

Within the talk are many esoteric principles woven into the sounds of your mental tools for inner transformation. The profound and contemplative nature of our souls requires us to listen and obey the inner laws of Higher Life and live accordingly with its indications. Principles sourced from ancient Egyptian esotericism coupled with the mystical approach of the Tibetan plus much more makes this talk a must to listen and to hear the subtlety of instructions for your own illumination.
